

Call Australia Mobile Service Compatible Handset List

We offer Telstra Wholesale GSM re-sale. The following mobile phones have been tested by Telstra and are COMPATIBLE with Telstra's MobileNet Digital mobile phone network. It should be noted that the phones have not been tested by Telstra on other GSM mobile phone networks.

Current Models

A tick [✓] indicates that a phone has been tested and passed. A cross [X] indicates failure to meet specific product requirements. N/A indicates not available or supported. N/T indicates available but not tested.

You may only access the Mobile Service and the Value Added Feature with equipment, SIM cards and other devices approved by us. You may only use the Mobile Service and the Value Added Feature with a mobile phone or other device as being compatible with the Value Added Feature. However, you agree that:

- we do not represent or guarantee the extent to which a handset, Mobile Equipment or other device we specify as being compatible for use with a particular Value Added Feature will be able to be used with that Value Added Feature; and
- your ability to use a Value Added Feature and each of its features will depend upon the features and functionality of your handset or Mobile Equipment."

Call Australia does not warrant the merchantability or suitability of these phones or that they will operate adequately in the areas in which a customer may wish to use them. A mobile phone's performance will be affected by a number of factors, including the quality of the phone, the extent of network coverage in the relevant area, local topography and radio interference.

Call Australia Mobile Services Incompatible Phone Listing 09/01/2004

The following mobile phones have been tested by Telstra for compatibility with Telstra's MobileNet Digital network and did not pass some or all of those tests.

The failure of a phone to pass Telstra's compatibility tests indicates that a user may encounter difficulties using the phone on Telstra's MobileNet digital network but does not indicate that the phone is of poor or unmerchantable quality.

The phones on this list have not been tested by Telstra for compatibility with any other GSM mobile phone network and may operate satisfactorily on such networks. Phones on this list may still be connected to the Call Australia mobile services, however the user may encounter some difficulties using the phone.
